

THE VALUE OF STUDENT TRAVEL

For young people, travel is an education in itself. It helps build self-esteem, independence, tolerance and cultural understanding, while breaking down barriers to a child's personal, educational and social development. Patterns and habits embraced when traveling at an early age are known to influence future decisions. The benefits of travel go beyond education. Increasingly, governments and businesses are recognizing the positive effects of youth travel as a powerful life experience that promotes economic development, job fulfillment and cultural understanding.
